

# sendSMS – HubSpot Integration guide

# Informations

## Easy setup

Add sendSMS to HubSpot without any technical knowledge just with your sendSMS account. Reach out to our team to assist you in creating the authentication and setting up the desired Sender IDs in the countries of interest.

## International Support

Send text messages globally with all countries supported. Reach your prospects and contacts easily wherever they are. Our Support team is available with no additional costs to help you with any issue or advice you might need.

## sendSMS account

Firstly, you will need to have a sendSMS.ro account. You can create one here:

<https://hub.sendsms.ro/register>

If you need help during this process, you can reach out to use here:

<https://www.sendsms.ro/en/contact-2/>

## Features

- Contact-based SMS Workflows
- Personalized SMS
- SMS Conversation Window
- Transactional Messages
- Easy send Bulk SMS

## Initial set-up

1. Log-in into your sendSMS account and go to:  
<https://hub.sendsms.ro/panel/hubspot>

The screenshot shows the 'sendSMS Web Application' dashboard. The top navigation bar includes links for Dashboard, Inbox, Agenda, Reports, Buy Now, APPs, HLR, Portability, Account, and Help. The user's account balance is shown as 'catalin\_demo' : € 3.609. A large arrow points to the 'APPs' menu, which is open, showing a list of integrations: Shopify Integration, Hubspot Integration (highlighted), Plugin WooCommerce, Plugin Prestashop, Plugin Magento, Plugin OpenCart, Plugin CS-Cart, and eMag Marketplace. The dashboard also features a 'Your Dashboard' section with a welcome message for 'Catalin\_demo' and a remaining balance of € 3.609. Below this are 'Helpfull links' for viewing messages, managing contact books, setting reports, and viewing coverage. On the right, there are sections for 'Send Batch' and 'Buy Credit', and a 'Getting Started is Easy' section with three steps: 'Click on the link and choose the payment method you prefer', 'use our easy-to-use tools to manage your online address book', and 'monitor your statistics with advanced real time reporting'.

2. Allow us to use your HubSpot account.

The screenshot shows the 'Hubspot Integrations' page in the 'sendSMS Web Application'. The top navigation bar is the same as the previous screenshot. The page title is 'Hubspot Integrations'. Below the title is a table with the following columns: ID, Hubspot Domain, Scopes, App ID, User ID, Hub ID, and Actions. The table is currently empty. Below the table is a button labeled 'Allow HubSpot Now'.

3. Chose the account you want to integrate with

Connecting **sendSMS** to **HubSpot**

**sendSMS** by [sendsms.ro](https://sendsms.ro)

---

**Choose an account**

Find an account by name, domain, or ID 

NAME	DETAILS
<input type="radio"/> App test account 4	App test account 4-dev-19962340.com 19962340
<input type="radio"/> Video	Video-dev-20051012.com 20051012

Choose Account

< Prev 1 **2** Next >

4. Log-in into your sendSMS account again and you are done

Application **Hubspot** is requesting to use your SendSMS account, do you wish to allow this? To allow Hubspot you have to login.

Username	<input type="text"/>
Password	<input type="password"/>

**Sign in using your existing account**
